What is the Endocannabinoid System (ECS)?

For pets and people alike, the endocannabinoid system (ECS) is perhaps the most important physiological system involved in establishing and maintaining optimal health as this ubiquitous system mediates a homeostatic balance of the nervous and immune systems in conjunction with other

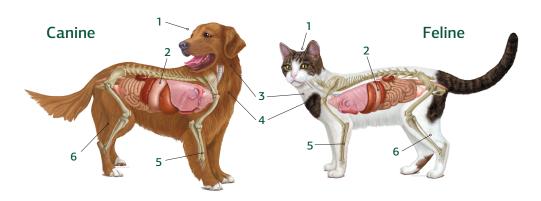

organ systems.¹⁻⁴ The physiological effects of cannabinoids and their respective cannabinoid receptors are common among all mammals⁹ — a well-balanced ECS is associated with favorable health outcomes, while imbalance is often associated with a variety of health challenges.³

VF Hemp Oil and Canine Hemp Oil Complex™

The endocannabinoid system helps support:

- 1 Neuronal System
- 2 Gastro-Intestinal System
- **3** Endocrine System
- 4 Immune System
- **5** Bone System
- 6 Muscular System

What makes Standard Process hemp supplements better than other hemp-based supplements?

Grown on our Organic Farm

Our hemp is proudly grown on our certified organic farm, which helps preserve its exceptional quality from seed to supplement. It comes from organic, non-GMO strains.

Exceptionally Clean Production Techniques

Our Supercritical Fluid Extraction process provides a full-spectrum extract by utilizing carbon dioxide (CO2) instead of harsh solvents or chemical converting procedures. We are also able to dry the product quickly to help ensure freshness.

Strict Quality Standards

Each batch of hemp oil is independently tested to ensure it lives up to our high expectations. The result is an ingredient that is pure, potent, and certified organic.

The **great majority** of the raw plant ingredients used in our products are grown on our certified organic farm

Freshly picked crops are often processed within a day to maintain vital nutrients

We harvest more than **6.5 million** pounds of ingredients on our certified organic and sustainable farm

Healthy Soil. Healthy Plants. Healthy Lives.

Standard Process is a family-owned company dedicated to making high-quality and nutrient-dense therapeutic supplements for three generations.

We apply a holistic approach to how we farm, manufacture and protect the quality of our products. This comprehensive strategy ensures that our clinical solutions deliver complex nutrients as nature intended. It's how we define the whole food health advantage.
